SCHOLASTIC RECORD

Year	Degree	Institute	CGPA/%	Remarks
2024	MBA (OSCM & Marketing)	Indian Institute of Management, Mumbai	8.42/10	First Class
2020	B.Tech (Chemical Engineering)	Laxminarayan Institute of Technology, Nagpur	7.38/10	First class
2016	12th (Maharashtra State Board)	Dr. Ambedkar College, Nagpur	82.15	Distinction
2014	10th (CBSE)	Kendriya Vidyalaya Ajni, Nagpur	9.8/10	Top 1% in School

WORK EXPERIENCE

(29 MONTHS)

Delhivery Limited	Senior Manager – Supply Chain Planning & Operations Excellence	Apr 2024 – Present
Roles & Responsibilities	- Architected data-driven demand forecasting models on six months of shipment history: day-wise trends, week-on-week run-rates, client-wise demand, festival seasonality and lane-wise movement - Conducted what-if scenario modelling across best/expected/peak demand with sensitivity analysis on fleet, manpower and throughput; built contingency plans with backup fleet, overtime and alternate routing - Redesigned last-mile route allocation on pincode-wise shipment density rather than fixed geography, consolidating high-density zones and merging low-volume routes to maximize fleet utilization - Architected integrated first-mile supply plans synchronizing client pickup slots, forecasted volumes, fleet availability, driver allocation and warehouse receiving capacity to ensure timely collections - Converted demand forecasts into manpower, vehicle, dock and processing plans with FM, warehouse and LM teams; implemented auto-docking to minimize transporter detention - Led 50+ associates; built planning capability and a data-driven improvement culture through structured coaching and reviews - Partnered with the tech team to build a pickup-readiness input into the FM app, creating a client feedback loop between shipment readiness and fleet dispatch - Applied Pareto analysis to prove a small share of aged orders drove disproportionate service failures; built an ageing matrix (age x SLA x customer criticality) with daily priority lists to minimize shipment ageing - Led structured root-cause analysis (Pareto, 5 Whys, fishbone) tracing 80% of delays to late pickups, capacity shortages and route imbalance; drove corrective actions across planning, routes, SOPs and vendors - Owned vendor performance management: monthly scorecards, corrective action plans and preferential allocation for top performers - Engineered interactive Power BI dashboards consolidating demand, ageing, throughput, utilization, OTD, CPDD and SLA adherence, with filters by client, location and shipment stage - Segmented forecasts into B2B, B2C and Heavy shipment buckets and published daily and weekly forecasts using Excel, SQL extracts and Power BI, replacing single-average planning - Instituted weekly forecast-vs-actual reviews; applied root-cause analysis to variance drivers such as customer behavior, promotions, weather and operational constraints, and recalibrated the model - Institutionalized KPI governance (OTD, CPDD, throughput, ageing, utilization) through structured reviews; owned benefits tracking and milestone reporting - Governed fulfilment for enterprise clients (Voltas, DentalKart, Columbus Clean, Nykaa), synchronizing inventory, warehouse capacity and dispatch schedules to protect SLA commitments - Diagnosed peak-hour vehicle unavailability as slot-clustering across clients with suboptimal vehicle sizes; decluttered pickup slots and right-sized fleet area-wise to eliminate idle fleet movement - Drove first-mile cost optimization through slot decluttering, area-wise vehicle right-sizing and structured pickup adherence tracking - Ran time-and-motion studies and ABC-classified SKUs by movement frequency and order velocity; relocated fast movers to dispatch-facing slots to minimize picker travel time - Mapped the scan-to-sort-to-bag-to-dispatch value stream using Lean principles; balanced workloads, redesigned workstations and standardized work methods to eliminate waiting time and queue formation - Owned Nagpur gateway and three IPCs (Chhindwara, Chandrapur, Gondia) across first mile, linehaul, last mile and B2C; standardized execution	
Achievements	- Delivered Rs 92 lakh in annualized savings by reducing last-mile delivery cost Rs 0.25/kg through density-based route redesign; dynamic routing and load consolidation lifted vehicle utilization 22% - Saved Rs 6.48 lakh monthly (CPK-Rs 0.18) via first-mile slot decluttering and vehicle right-sizing; FM-app feedback loop lifted pickup tonnage 8% with 97% adherence - Raised OTD 15% and achieved 98% CPDD compliance by replacing reactive firefighting with forecast-driven capacity planning across B2B, B2C and Heavy demand buckets - Compressed fulfilment lead time 25% through Pareto-based ageing-matrix prioritization; elevated storage efficiency 18% and processing productivity 13% via ABC velocity slotting and Lean value-stream redesign - Improved resource allocation efficiency 20% and sustained 100% enterprise SLA adherence by aligning forecasted demand with fleet, manpower and processing capacity - Slashed transporter detention 15.3% through auto-docking at available docks, improving dock throughput and cost-to-serve	

Waycool Foods & Products Pvt. Ltd.		Supply Chain Intern	Apr 2023 – Jun 2023
Project Details: Outbound Logistics cost optimization for General Trade (GT) and Third party (3P) brands			
Roles & Responsibilities	- Conducted a comprehensive As-Is Analysis of supply chain operations, pinpointing bottlenecks in existing processes - Conducted Root Cause Analysis and implemented weight-based order placement, enhancing operational efficiency - Leveraged K-means clustering using Python to get demand centers to identify high-return geographical locations Partnered with 3P executives to Streamline Order Processing onto an integrated platform reducing processing time - Implemented Product Pooling strategies resulting in 15% increase in vehicle space utilization & minimized carbon footprint - Optimized carton box dimensions through Competitor Benchmarking, resulting in a 10% rise in FMCG packaging efficiency - Formulated a control procedure & SOP to improve stock keeping practices & material flow of 250+ SKUs - Spearheaded Vendor Management initiatives, assessing supplier performance with key performance indicators (KPIs)		
Achievements	- Achieved distinction as the top summer intern among 30+ peers for exceptional dedication & contributions - Delivered a 20.13% reduction in outbound logistics costs, translating into substantial annual savings of Rs. 67 lakhs - Elevated OTD performance to 92% overall, coupled with a significant 15% improvement in OTD for 3P orders		

CORPORATE PROJECTS

Aveva Group		Dec 2022 – Jan 2023
Project Title: Viability of ASRS system in Logistics		
Project Details	- Utilized feasibility study to highlight ASRS system benefits, including enhanced efficiency, accuracy & cost savings - Evaluated warehouse layout optimization, streamlined Inventory Management processes and order processing	
Achievements	Achieved 25% cost reduction and 30% time improvement transitioning to the ASRS system from manual logistics	

POSITIONS OF RESPONSIBILITY

Joint Secretary, (BS&G, Nagpur)	Orchestrated a 30-member team in organizing a state rally with 700+ participants from 6 divisions - Headed 15+ impactful events promoting Community Development & environmental stewardship	2022-23
Publicity Head	Spearheaded a team of 35+ members to publicize the events in 20 colleges for 350+ participants	2020
Team Leader	Managed the traffic, guided & relocated 4 million+ devotees per day to their respective spots at Kumbh	2019

AWARDS & ACHIEVEMENTS

Certifications	Supply Chain Logistics & Planning, Rutgers, Uni.	2022	Digital Supply Chain Twins, IIM Mumbai	2023
	Data Driven SC Transformation, IIT BHU	2022	Business Analytics in Excel, Simplilearn	2022
Extra-curricular	Led impactful Animal Welfare initiatives & driving awareness campaigns as a dedicated PETA member	2021-23		
	Received an Award from the President of India for social work in Bharat Scouts & Guides	2015
